► Specialist in industrial valves and actuators

Since 1992 VCC BV has been specialized in the supply of valves and actuators for the cryogenic and steam industry. Over the years, various product lines and activities have been added through various acquisitions and expansions. One of our specializations is cryogenic valves and safety valves. We are proud to represent, amongst others, Herose GmbH in the Benelux. We focus on supplying a wide range of technical components to the steam, cryogenic and process industries. In this niche market we have built up a good reputation.

VCC specializes in:

- ✓ Control valves
- ✓ Pressure reducers
- ✓ Cryogenic valves
- ✓ Safety valves
- ✓ General valves
- ✓ Actuators

For our delivery program, certificates, quality marks, tips, news and information request, please visit www.vccbv.nl

► Expertise and service supplier

While sister company VCC BV focuses on the solutions, sale and delivery of new technical components, A.S.E. Repair BV is specialist in building, installing and maintaining valves in cryogenic and steam installations. We are also allowed to certify safety valves acc. Lloyds (NOBO), up to 1,500 BAR.

Our organization distinguishes itself as a knowledge and total service supplier within this market. Thinking along with clients in preventing, minimizing and solving technical problems, improving industrial processes and searching for the best and most affordable practical applications is anchored in the DNA of A.S.E. Repair BV.

As a unique service, A.S.E. Repair BV offers oil and grease-free cleaning valves for oxygen use. We are specialized in advice, maintenance, repair and installation for:

-  **Control valves**
-  **Safety valves**
-  **Pressure reducers**
-  **Valves**
-  **Cryogenic valves**
-  **Actuators**

A.S.E. Repair BV is an authorized service center for cryogenic valves of Herose GmbH and Vinco Valves, including safety valves and remote-controlled valves. In addition, we take care of, for example, exchanging control valves and safety valves in your plant.

► Proud importer of a global brand!

HEROSE GmbH products occupy a prominent place in VCC BV's product range. We are proud to be importer of this international market leader for the Benelux. HEROSE GmbH is an innovative developer and manufacturer of fittings such as valves, safety valves and control valves for cryogenic and other industrial applications.

In all cases, these are high-quality and certified products that meet the strictest quality and safety requirements.

Our sister company A.S.E. Repair BV has been certified by Herose as Service Center for safety valves, cryogenic valves, regulators and pressure build-up regulators.

▶ New collaboration, trusted quality.

VCC BV collaborates with the Portuguese family business Vinco Valves. Together they present, for instance, the new cryogenic ball valve 'VC Valve'. Especially for situations in which a high KV value or small pressure drop is required. This European manufacture offers maximum quality for extreme circumstances at a minimal delivery time. Vinco Valves has been operating in the cryogenic industry since 1990 and independently develops high-quality ball valves (also metal-sealing) for the chemical, petrochemical, and offshore industries. The combination of passion, culture, and technology between the companies is unique within the cryogenic market.

Also for: cryogenic solenoid valves, top entry valves (-269 °C) and pressure regulators.

▶ One-stop-shop for the industry

For many years, our company group has been specialized in advice, sales, repair, installation and maintenance of industrial valves for the steam, process and cryogenic industry. After the takeover of the VCC BV company, a wide range of new technical components were added. VCC BV became well-known as distributor of various leading brands. In addition, VCC BV is also an importer for the Benelux of among others Herose and Vinco Valves.

We are here for you!
